

ALTUR GREEN LINE is a complete range of products for the care of your agricultural vehicle. Using Altur products it is possible to keep its aspect new and shiny like on the first day, on the maximum environment respect.

ECOLOGICAL

NANO POLYMERS

DIRECTIONS FOR USE:

SHAKE WELL BEFORE USE.

1. Wash accurately the vehicle to be treated with one of the 2 proposed detergents, according to the dirt condition;
2. After rinse, wait for drying to prepare the surfaces for a perfect adhesion of SCHUTZ BARRIERE;
3. Pre-dilute the product 50% with water
4. Spray uniformly with a nebulizer (use the product pure in case of application to a wet vehicle).
5. Wait the products drying (about 5 minutes under the sun rays) before exposing it to the treatments;
6. At the end of the working day it is recommendable to wash the vehicle to remove the contaminating agents together with the protection film. This can be done with the help of TRAKTOR WASH cleaner or just with a high pressure water jet. This is very important to prepare the vehicle before a fresh application of SHUTZBARRIERE.

SCHUTZ BARRIERE contains polishing nano polymers, which protect the surfaces and make them shiny.

The product is totally free from mineral oil, solvents, surfactants and hydrocarbons.

PROTECTIVE SHIELD FOR AGRICULTURAL MACHINERY

Today there is a wide use of hydrocarbons based substances, to protect the surfaces of the agricultural machinery from the aggression and contamination of copper sulfate, fungicides, substances sprayed to protect the cultures. Those hydrocarbons are dangerous for the environment, for the user and after some time they are aggressive for the paint of the machineries. Now you can use SHUTZ BARRIERE, an environmental friendly product, developed from ALTUR laboratory: innovative protective wax for agricultural machinery and vehicles, totally biodegradable, natural base.

Perfectly insulates all the surfaces of the vehicle and machinery exposed to the contact with chemicals as for example: FUNGICIDES, WETTABLE POWDERS, COPPER SULPHATE, etc.

Easy to use, Shutzbarriere dries quickly exposed to the sun , providing a transparent and elastic protective film, ideal for daily protection.

The application can be done in any place, with a nebulizer and it lasts until its removal, which will be done with a high pressure water jet. It is recommended to restore the protection every day, removing it and respraying, to get the maximum protection effect.

After rinsing the vehicle, it will look even more shine, because Shutzbarriere is added with a special polishing nano-tech agent.

ALSO RECOMMENDED

TRAKTOR EXTRA

INTENSIVE CLEANER

Active foam detergent for intensive cleaning and degreasing of agricultural machineries and vehicles. Quickly and effectively removes any kind of dirt. Added with a special brilliant agent which improves the final rinse, helping to reduce water spots on the windows. Ideal to prepare the vehicle clean before starting the treatments with SCHUTZBARRIERE. Formulated with highly biodegradable materials.

TRAKTOR WASH

MAINTENANCE CLEANER FOR FREQUENT WASHES

Active detergent for exterior wash of all agricultural vehicles. Ideal for frequent washes and in the warm season, because it respects all the surfaces. It combines an efficient cleaning action with an anti static and brilliant effect. Ideal for washing the vehicle frequently, after every treatment with SHUTZBARRIERE. Formulated with highly biodegradable materials.
